ORGANIC PERUVIAN SUPERFOODS

# ABOUT US

we have started to **produce and market natural, functional foods** made from our native Peruvian biodiversity from 2010. We offer final bulk product to suit the needs of each of our clients, harmonized with ethical principles that we seek to achieve a real sustainable development, by helping to improve the quality of life of all the links in this valuable chain, we work for the health and welfare of people, from original, native Andean and amazonian communities, through to customers.

We have 10 years experience in the production, marketing and export of natural medicinal plants, healthy snacks, organic superfoods and natural supplements.

*Welcome to the world  
of Biodiversity*

# VISION

We look for **naturalness** in our processes and we are fully committed to the care and sustainable use of our biodiversity, which we understand the diversity of all living things, from the human to the microorganisms, organic certified products (PERU, EU, USDA and COR) including also the variety ecosystem promote the conservation of biodiversity and ecosystems, we believe it is important for the survival of our planet. Our Most important goal is changing the paradigm from Export of Raw Material to Development of Final products.

As a result, **Amazon Andes** seeks to offer products with added value and final presentations , in order to make our country recognized as supplier of high value and innovative products.

# OUR PILLARS

## HEALTHY

We offer healthy products that help to improve life quality of our final consumers.

## SUSTAINABILITY

our commitment to the planet and ecosystems

## FAIR

We pursue to get equity and fair distribution of benefits with the local communities that provide us with raw materials.

# INFRASTRUCTURE

Our has been in operation **since 2011**. currently our factory is located in San Juan de Lurigancho - Lima (Total área = 600 m2 / constructed área = 400 m2) , Commercial offices are located in Miraflores - Lima.

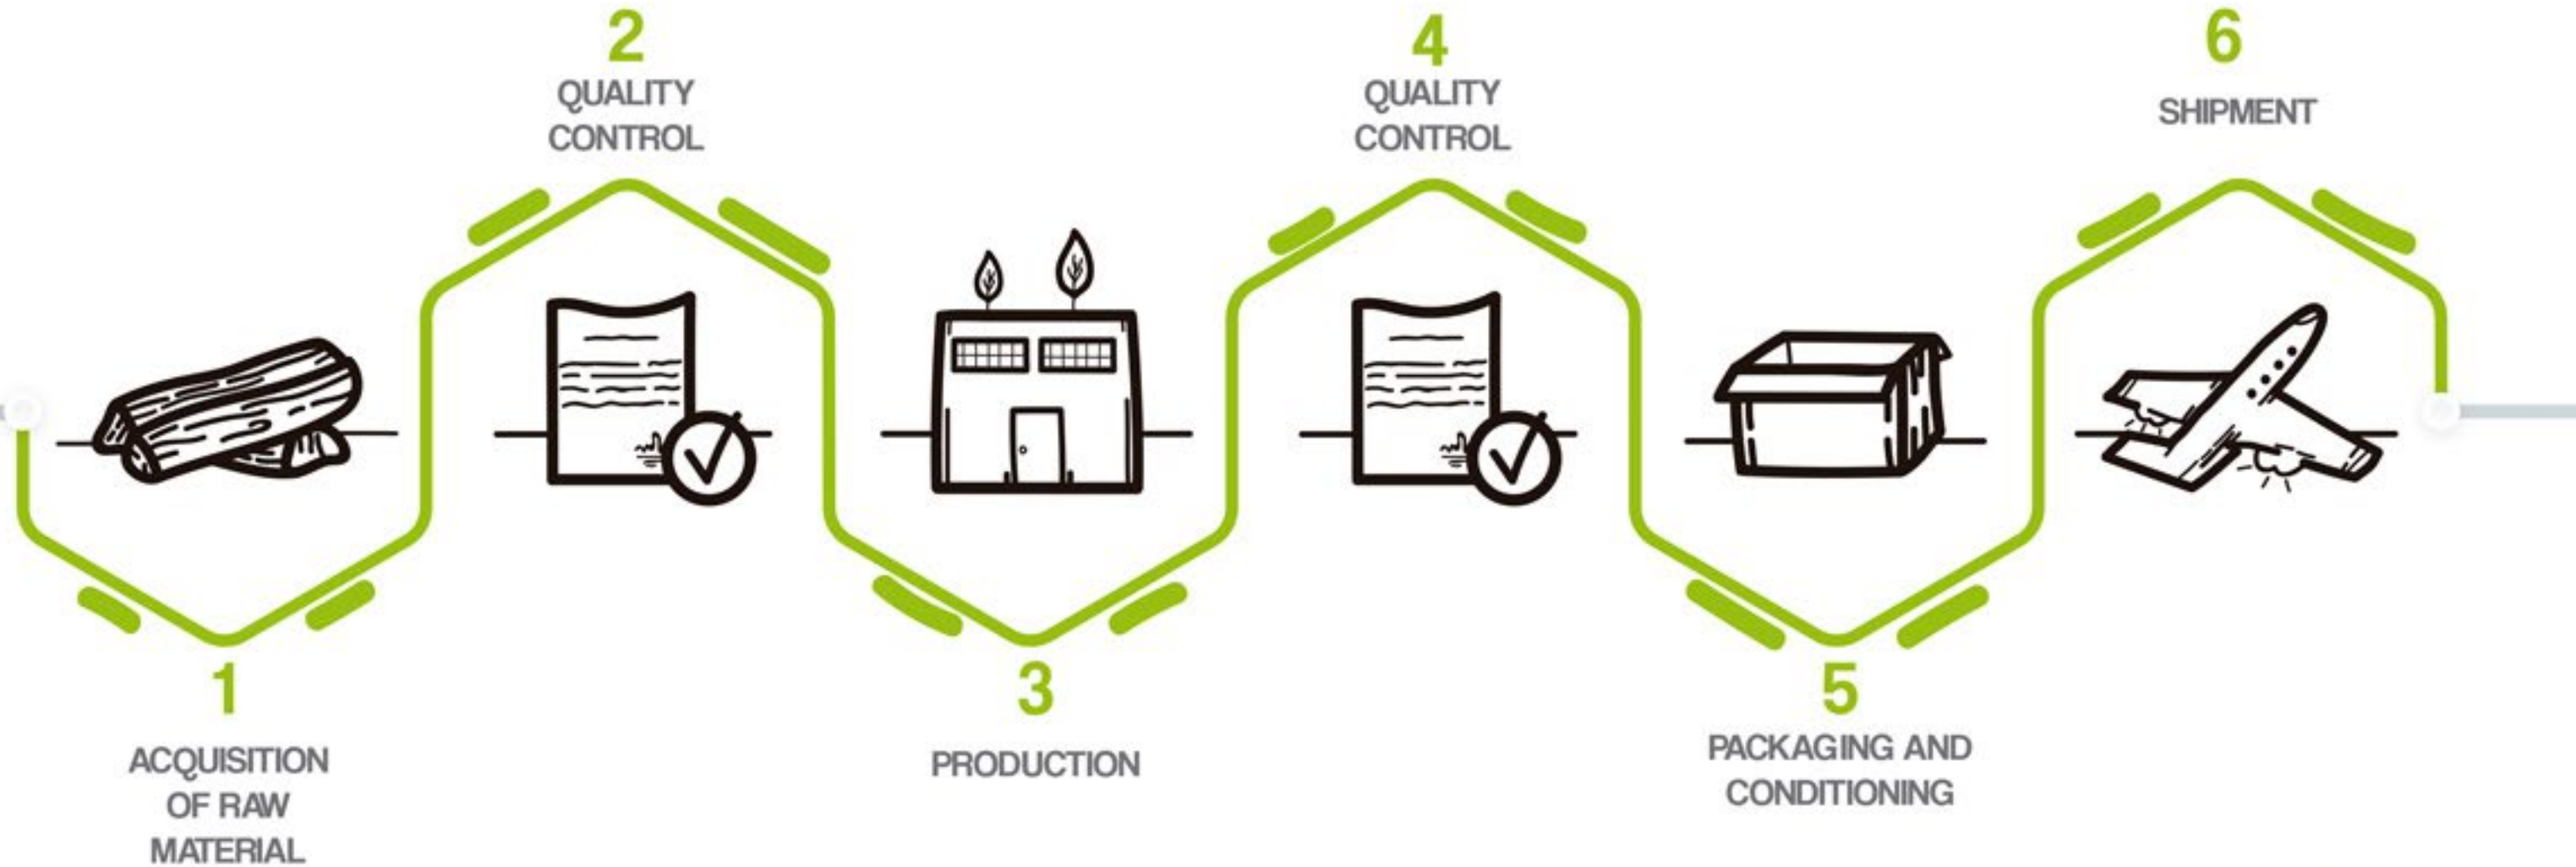

Our facilities allow us to constantly maintain control of the entire process, starting from the acquisition of the raw material to the direct shipment to our customers.

“ Our main infrastructure is the people immersed in our value chain, from our suppliers in the Andean Amazonian communities, through our collaborators and ending with our final customers. ”

# RAW MATERIAL COLLECTION PROCESS
